```java
import java.util.Scanner;
class SearchEngineSurvey {
    private Respondent respondent;

    public SearchEngineSurvey() {
        this.respondent = new Respondent(1, "John Doe", "25", "Male");
    }
    public void updateRespondentInformation() {
        Scanner scanner = new Scanner(System.in);

        System.out.println("Current Respondent Information:");
        displayRespondentInformation();

        System.out.println("\nUpdate Respondent Information:");

        System.out.print("Enter new name: ");
        String newName = scanner.nextLine();
        respondent.setName(newName);

        System.out.print("Enter new age: ");
        String newAge = scanner.nextLine();
        respondent.setAge(newAge);

        System.out.print("Enter new gender: ");
        String newGender = scanner.nextLine();
        respondent.setGender(newGender);

        System.out.println("\nRespondent information updated successfully.");
        displayRespondentInformation();
```

```java
    }

    public void displayRespondentInformation() {
        System.out.println("Respondent ID: " + respondent.getRespondentId());
        System.out.println("Name: " + respondent.getName());
        System.out.println("Age: " + respondent.getAge());
        System.out.println("Gender: " + respondent.getGender());
    }
}

class Respondent {
    private int respondentId;
    private String name;
    private String age;
    private String gender;

    public Respondent(int respondentId, String name, String age, String gender) {
        this.respondentId = respondentId;
        this.name = name;
        this.age = age;
        this.gender = gender;
    }

    public int getRespondentId() {
        return respondentId;
    }

    public String getName() {
        return name;
    }
```

```java
    public void setName(String name) {

        this.name = name;

    }

    public String getAge() {

        return age;

    }

    public void setAge(String age) {

        this.age = age;

    }

    public String getGender() {

        return gender;

    }

    public void setGender(String gender) {

        this.gender = gender;

    }

}

public class Main {

    public static void main(String[] args) {

        SearchEngineSurvey survey = new SearchEngineSurvey();

        // Menampilkan informasi responden sebelum diubah

        System.out.println("Initial Respondent Information:");

        survey.displayRespondentInformation();

        // Memperbarui informasi responden

        survey.updateRespondentInformation();

    }

}
```
